

Flights/Segments in all current materials.
Delivered as segments

Screw rotors in all current materials.
Delivered as a component according to drawing
or in concert with our sales department.

Screw conveyors produced individually to each job.
Delivered as a component according to drawing or
in concert with our sales department.

Complete transportsolutions with screws as basic
component. Drawing and design in concert with
our sales department.

Production facilities:

1st. November 2007 build of a new production area of 1500m² has been started. The expansion provides the ability to continue the planning of logistics and flow customized for the production of

Screwconveyors - screw rotors og screw flights.

The new production area is expected ready for use in the spring 2008

Screwconveyor Ø700x9000mm.

Produced in stainless steel AISI316, pickled surface.

Lifting screws with capacity of:

- Up to app. 200 t/hour.
- Corresponding to a transporting volume of 250 m³/hour.

Production of Screwrotors.

Heavy duty screwrotor for waste grinding machine.

Angled flight segments with outer reinforcement.
